

**Anjanette Green, Director Standards Development, RESET™**

Anjanette is Senior Fellow, co-author and Director of Standards Development for RESET™, spearheading the world's first certification program to utilize continuous monitoring to measure the health performance of the built environment. Anjanette was consultant for the first certified RESET Air projects in the world and has been on the forefront of research and critical analysis of the health and well-being of building occupants for the better part of her career.

With 17+ years of experience in Architecture and Design, Anjanette has specialized skills in regenerative design technologies and has advised on single and multi-attribute building and material certification projects across the globe. Working with clients from China to New Zealand she has analyzed materials and manufacturing processes to provide solutions for some of today's most challenged sectors.

As a materials analyst, Living Product Assessor and Declare third-party verifier for the International Living Future Institute, Anjanette is among an elite group of experts working to bring healthier products to market. Anjanette has worked tirelessly with a wide spectrum of manufacturers assessing ingredients in supply chains and advocating for the removal of chemicals of concern that contribute to poor health and unhealthy air quality.

To date, Anjanette has employed biomimetic design and green chemistry to replace some of our most onerous chemicals of concern ubiquitous to the building and construction industry.

She has authored and contributed to HPDs, EPDs, numerous Declare labels, Living Products, international PCRs as well as served on the advisory boards and peer review groups for domestic and internationally-recognized green building certification programs.

Anjanette was the first LBC ambassador in China and Consultant for the country's first LBC projects. In 2017, she was the first LBC Ambassador in Peru helping to foster the efforts of the growing LBC Collaborative in South America.

This year, Anjanette was presented with the Living Building Challenge's prestigious Hero Award for her contributions to the International Living Building Institute.
